

DrayTek

3G modem/cellphone list

The following 3G modems / cellphones have been tested with **Vigor2110 series** , **Vigor2130 series**, **Vigor2710 series**, **Vigor2800 series** , **Vigor2820 series** , **Vigor2910 series** , **Vigor2920 series**, **Vigor2955**, **Vigor3100 series** , **VigorPro 5510 series**, **VigorIPPBX 2820 series** . Many other standard 3G modems / cellphones will also work; please download latest Firmware for your Vigor router.

Note: If your 3G modem is not in the compatible list, please check if the router firmware version is the latest version or not.

If not, please download and install the newest one. After finishing the installation, if the router still can not work, please capture the syslog and contact with us.

- (1) Check /download the Firmware version: <http://www.draytek.com/user/SupportDownloads.php>
- (2) Configuration fro 3G connection: <http://www.draytek.com/user/SupportFAQDetail.php?ID=1943>
- (3) Setting the Syslog: <http://www.draytek.com/user/SupportTroubleDetail.php?ID=10>
- (4) Download Syslog Utility: <http://www.draytek.com/user/SupportDLUtility.php>
- (5) If your modem works fine with Vigor router but not listed in current compatible table, please contact with DrayTek service center.
- (6) “■” symbol indicates the modem or mobile phones already supported by the current released firmware.
“◎” symbol indicates the modems or mobile phones should be (but not yet) supported by the current released firmware.
Please contact support@draytek.com if you have any problem.
